Education

Cairo University

June 2024

Bachelor of Computer Science (Grade: Very Good With Honors)

- **Relevant Coursework:** Data Structures and Algorithms (C++), OOP, Web Development, Advanced Software Engineering, Math, Networks, Graphics, Compilers, Natural Language Processing, Machine Learning.

Experience

Unlimited Software

June 2024 – Till Now

Flutter Developer

Hybrid - Full Time

- Maintained the legacy code on Kiddows app, fixed numerous bugs, and improved the performance by 80%, which contributed to a 30% increase in our customer base.
- Spearheaded the launch of Nageeb app, a cross-platform educational application tailored for the Qatari market. The application was seamlessly integrated with Firebase and our backend systems. Post-launch, the app garnered positive feedback, reflecting its robust performance and user satisfaction.

EraaSoft

Sep 2023 – Oct 2023

Flutter Developer Intern

Hybrid - Internship

- Designed and implemented responsive apps interfaces with Flutter, resulting in distinguishing one of my apps as the top performer among those developed by my peers.
- Contributed to the adoption of agile methodologies, utilizing Trello.

Roqay

Jul 2023 – Sep 2023

Flutter Developer Intern

Remote - Internship

- Under my leadership as a Flutter intern and team leader, I guided the design and implementation of the Deraya application using Flutter, resulting in our app being recognized as the best among those developed by our peers during the internship.

Projects

Nageeb | Flutter (Android, IOS), Firebase, Laravel

Unlimited Software

- Spearheaded the launch of Nageeb app, a cross-platform educational application tailored for the Qatari market. The application was seamlessly integrated with Firebase and our backend systems. Post-launch, the app garnered positive feedback, reflecting its robust performance and user satisfaction.

Tree Website | Flutter Web

TREE

- participated in building TREE website, where I addressed and resolved issues related to scrolling and animations. Our Team's work resulted in a successful marketing campaign for TREE.

Student Web Notifications System | Flutter Web, One Signal

Freelance

- As a freelance Flutter developer, I successfully delivered a cross-platform application compatible with Android, iOS, and Web. The project featured distinct login systems for both administrators and students, ensuring a secure and user-friendly experience across all platforms.

Kiddows | Android, IOS

Unlimited Software

- Maintained the legacy code on Kiddows app, fixed numerous bugs, and improved the performance by 80%, which contributed to a 30% increase in our customer base.

Ketapy | Android

EraaSoft

- Redesigned Ketapy, a book store application, with a fresh and modern color palette. The new design incorporated a harmonious blend of vibrant and calming tones, enhancing user engagement and making the browsing experience more visually appealing.

My Portfolio | Flutter Web

Personal Project

- Designed and developed a portfolio website that showcases my skills and projects. With a modern aesthetic, it highlights my expertise in Flutter development and features a curated selection of my best work, offering a compelling glimpse into my capabilities.

Technical Skills

Languages: Dart, Javascript, Html, Css, C++, Java

Technologies: Flutter, Firebase, Android SDK, Laravel, Web

Concepts: Compiler, API, Web Sockets, Operating Systems, Virtual Memory, Cache Memory, Data Compression, Artificial Intelligence, Machine Learning, API, Database, Agile Methodology, Cloud Computing

Volunteering Experience

TREE

Feb 2024 – Aug 2024

Flutter Developer & Instructor

- I corrected tasks and assisted participants with their problems.
- participated in creating TREE website using flutter web.

Google Developer Student Club

Oct 2023 – Jun 2023

Flutter Community Member

- I corrected tasks and assisted participants with their problems..

Courses

The Flutter Development Bootcamp By Angela Yu

Flutter Advanced Course Bloc and MVVM Pattern By Tharwat Samy

Achievements

Ranked 30 out of 220 Teams in The Egyptian Collegiate Programming Contest summer 2022

Secured first place in the Na3ml Hackathon by developing the Deraya application using Flutter.
